TABLE III

Following, according to the WEF GCR, are the current country rankings (among 144 economies) for the importance for competitiveness of the 'Tax' parameter, which is explained as follows:

• (Competitiveness)Pillar 6: Goods market efficiency 6.05 Total tax rate. This variable is a combination of profit tax (% of profits), labour tax and contribution (% of profits), and other taxes (% of profits) 2011. The total tax rate measures the amount of taxes and mandatory contributions payable by a business in the second year of operation, expressed as a share of commercial profits. The total amount of taxes is the sum of five different types of taxes and contributions payable after accounting for deductions and exemptions: profit or corporate income tax, social contributions and labour taxes paid by the employer, property taxes, turnover taxes, and other small taxes. For more details about the methodology employed and the assumptions made to compute this indicator, please visit http://www.doingbusiness.org/methodology surveys/. TABLE IV

As the WEF GCR 2012-2913 advises, it draws in part for this 'Tax' parameter ranking on the World Bank 'Doing Business 2012' Report. With the publication on 23rd October 2012 of the "Doing Business 2013" Report, the rankings (185 economies) have been updated and are set out below.
